WORK EXPERIENCE

UniPlanet LLC Remote / Stony Brook, NY
Software Engineer *September 2024 - Present*

- Built and deployed a **PyTorch-based CNN** model for classifying promotional posters, distinguishing special offers with 90% accuracy, reducing manual review time by 70% and enabling automated trend analysis.
- Developed a responsive **Next.js** dashboard with **TypeScript** and **D3.js** that visualizes ML poster analytics, leveraging **SSR** for performance, and reusable component architecture that reduced load times by 65%.
- Integrated **OpenAI API** with custom prompt engineering for smart content tagging, auto-generating targeted social media captions and hashtags based on promotional poster analytics.

CAIMI Co., Ltd. Incheon, Korea
Software Engineer *January 2022 - May 2023*

- Developed a **Python microservice** medical device inventory system using **Django** and **RabbitMQ**, enabling real-time status tracking and reducing device processing response time by 30%.
- Enhanced database performance with **SQL** query optimization and **Django ORM** composite indexing, reducing query times by 40% and infrastructure costs by 10%, leading to a 20% increase in user retention.
- Configured **AWS IAM** roles and permissions and deployed a **Kubernetes EKS** cluster with **Docker** images from **ECR**, reducing time-to-market by 25% and streamlining the deployment pipeline.

Tangram Factory Inc. Seoul, Korea
Software Development Intern *June 2021 - September 2021*

- Developed a real-time customer insights platform in **Node.js**, implementing event-driven architecture to optimize feedback processing, reducing latency by 35% and supporting 15,000+ simultaneous users.
- Implemented a scalable **RESTful API** for a web payment processing service using **Node.js** and **Express**.
- Improved **React** components with **Vite** and **Tailwind**, facilitating seamless transitions between PAYCO, Samsung Pay and other payment solutions, reducing customer wait times by 30% from 7 to 4 seconds.

PROJECTS

Personal Portfolio Website – Portfolio Link

Vitals – Github

MLH Hackathon 2024 - Best Health Project Award Winner *February 2024*

- Built an AI-powered dietary supplement recommender with **React.js** and incorporated a **HuggingFace's** pretrained sentiment analysis model, achieving 95% user satisfaction from 50+ testers.
- Implemented a custom API integration layer that connected the **JavaScript** stack with a **Python** service handling the machine learning inference, ensuring seamless data flow and responsive recommendations.

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, Shell Scripts
Others: Git, React.js, Redux, Node.js, SQL, MongoDB, Django, GraphQL, Docker, RabbitMQ, AWS Cloud

EDUCATION

State University of New York, Stony Brook Stony Brook, NY
Bachelor of Science in Computer Science *January 2020 - May 2024*
GPA: 3.3

HONORS AND AWARD

Vice President of SUNY Korea Computing Society *August 2022 - December 2022*

- Worked with university faculties to organize events, including seminars and weekly coding challenges.

Recipient of Stony Brook University Merit Scholarship *January 2020 - May 2024*
